Dear HONORABLE Uy

Greetings!

Xavier University through its Kinaadman University Research Office (KURO) will conduct a research project entitled "Influence of Habitat and Climate Variables on Dengue Vectors in Cagayan de Oro City" covering all barangays of Cagayan de Oro City. This research is funded by DOST-PCHRD with counterpart of Xavier University.

Dengue is one of the fatal diseases in the city, if not nationally and/or globally. The prevention of dengue has been closely tied to local surveillances and control of its mosquito vectors. The research team will conduct a study on the interplay of habitat and climate variables with dengue mosquito vector distribution and abundance in the city. Using Geographic Information System, it is our project's desire to come up with a predictive model from data of habitat, climate variables, and dengue mosquito abundances to identify where dengue outbreaks may likely occur in the city.

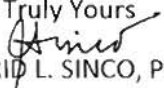

In line with this, we would like to have a resolution from the City Council on the following aspects:

1. Endorsement to the Punong Barangay for the conduct of our study titled "Influence of Habitat and Climate Variables on Dengue Vectors in Cagayan de Oro City";
2. Endorsement to tap on the services of City's CHO Sanitary Inspectors, BHWs, BNS, and Zone Leaders of the City's LGUs;
3. Endorsement to undertake data gathering activities on the monthly larval surveillances in as many as 100 households in each barangay for determining WHO standard dengue mosquito indices abundance (House Index, Breteau Index, Container Index, etc.);
4. Endorsement to install ovitraps as technique for collecting dengue vector mosquitoes on a monthly basis;
5. Endorsement to approve the Prior Informed Consent for the collection and conduct of field research;
6. Endorsement to approve the Prior Informed Consent for Gratuitous Permit Application
